

the range of coolers

DUO

DOMESTIC

The solution combines the functionality of the under counter model with the flexibility of an electronic tap

blupura

Cool, yes we are.

DUO

DUO system is truly saving you space as the tap electronics are integrated within the box system, this way there is no need to install additional components within the under sink area.

DUO box tap system perfectly blends within the kitchen environment and dispenses room and chilled temperature water as well as sparkling water if you choose the FIZZ version!

DUO fizz

The **Fizz** model dispenses cold sparkling water through a box of the same encumbrance of the base model.

Blupura Direct Chill

Hygienic, direct-cooling technology with large-capacity carbonator.

With **DUO** you save space and you only see the dispensing point.

With totally natural refrigerants (HC) such as R600.

An ecological choice, with the advantage of a quieter compressor that guarantees a longer life of the entire refrigeration system and energy saving.
